CS 103000
Prof. Madeline Blount

Week 8:
HACKATHON 1!

ENCRYPTION, “CTF”

Dall-E 2: cats learning C++ in the forest on ‘90’s technology

HACKATHON !

🤖 **hackathon!**

- Work today, in-class Wednesday, in-class Friday, and any time that you choose in between
- Delegate + discuss with team!
- Research and ask questions!
- Research *concepts* not code!

🤖 **hackathon!**

- You may not
  - Use methods from outside of class ***without citation***
  - Examples:
    - using #include <algorithm>
    - using .reverse(), .begin(), .end(), .insert(),
    - using .map()
    - using &, *
  - Programs should include in comments ***why*** you chose this method, vs. another method we've studied
  - Solutions that use such methods **without citation/explanation** will lose points

🚀 Grades

- zyBooks 16.40 will accept any submission! No “test” feedback this time
- I will be grading your code by hand/eyes, old-school 👀
- Individual grade, self-assessment
- Hackathon grade = 15% (same as all reading!)
- If helps class average, I will curve
- After this week, you will learn current class grade in Brightspace
- There’s hackathon 2, and extra credit opportunities! 🤖
